

Hoang Van Hoa (Nova Hoang)

Senior Frontend Developer · Angular & React · Enterprise UI

novahoangdev@gmail.com | (+84) 328 369 788 | linkedin.com/in/novahoangdev | github.com/novahoangdev

01 / PROFESSIONAL PROFILE

Senior Software Engineer with over seven years of experience building high-performance, enterprise-grade web applications. Deep expertise in Angular, TypeScript, React, and Node.js ecosystems, connecting robust technical architecture with thoughtful user experiences. Proven track record in technical leadership, mentoring engineers, driving design systems, and delivering multi-tenant mission-critical systems for global organizations including Changi Airport Group and Temasek Polytechnic.

02 / CORE EXPERTISE & CAPABILITIES

Frontend:	Angular, ReactJS, TypeScript, RxJS, Tailwind CSS, SCSS, Kendo UI, Ant Design, Bootstrap, Element UI
Backend & Data:	Node.js, NestJS, Sails.js, PostgreSQL, REST APIs, GraphQL
Architecture:	Enterprise UI, Design Systems, Performance, Agile/Scrum
Design & Tools:	Figma, Adobe XD, Photoshop, Illustrator, Git, Bitbucket, Jira

03 / PROFESSIONAL EXPERIENCE

Senior Software Engineer | SJ Group

May 2024 — Present

Architect enterprise Angular/Kendo UI portals and NestJS/Sails.js backend services for Temasek Polytechnic and Changi Airport Group, powering multi-tenant facility management, campus operations, fault dispatch, and procurement workflows.

- **Continuous Enterprise Delivery:**Spearheaded 24+ production releases across Fault Reporting, Smart Booking, Procurement, and Inspection modules using NestJS, Sails.js, and Bitbucket CI/CD pipelines.
 - **65% Faster Operational Workflows:**Implemented high-throughput bulk processing, custom data grids, and automated Excel/PDF report generation for asset licensing, warranty, and space management.
 - **70% Query & Search Latency Reduction:**Re-indexed PostgreSQL relational structures and streamlined fault-to-purchase-request linkage, cutting data retrieval times under heavy concurrent loads.
 - **Design System & UI Architecture:**Standardized reusable Kendo UI and Angular component libraries, improving frontend delivery velocity across 7 engineering team members.
- Technologies:** Angular, TypeScript, Kendo UI, NestJS, Sails.js, PostgreSQL, RxJS, Docker

Software Engineer | WATA Corp

Nov 2021 — Apr 2024

Engineered and scaled SaaS web platforms including The Mentor Method, Betterleave, and PoolZoom for US and international enterprise clients, focusing on scalable architecture, real-time APIs, and high conversion UX.

- **SaaS Platform Scalability:**Developed enterprise mentoring and care navigation portals using React, Angular, and Tailwind CSS, supporting thousands of active concurrent professionals.
 - **Real-time & AI Integrations:**Integrated Google Speech-to-Text real-time transcription, GraphQL subscriptions, and secure RESTful endpoints for interactive user sessions.
 - **40% Web Performance Boost:**Overhauled PoolZoom e-commerce catalog rendering with route-level code splitting, virtual scrolling, and optimized asset pipelines.
 - **Frontend Architecture & Mentorship:**Established strict TypeScript linting, reusable UI design systems with Ant Design, and conducted technical code reviews across multi-disciplinary squads.
- Technologies:** Angular, React, TypeScript, GraphQL, Tailwind CSS, Ant Design, RxJS, REST APIs

Software Engineer | Gumi Vietnam Co., Ltd.

Dec 2019 — Nov 2021

Delivered full-cycle fintech, CMS, and web applications for premier Japanese enterprise clients including Zoopay, Gumi JP, and Nikkan Sports.

- Fintech Rewards & Payments:**Built the Zoopay merchant portal and customer reward platform with Angular and Firebase, enabling seamless QR code redemption and point transaction histories.
- High-Traffic Media & CMS:**Constructed high-volume publishing interfaces and editorial CMS tooling for Nikkan Sports with sub-second page transitions and responsive web layouts.
- Hybrid Mobile Applications:**Delivered native mobile experiences using NativeScript, Angular, and React, maintaining unified code sharing between iOS, Android, and web.
- Engineering Mentorship:**Coordinated technical delivery with Japanese IT communicators and mentored 6+ junior engineers on modern JavaScript and component best practices.

Technologies: Angular, React, JavaScript, Firebase, NativeScript, Ant Design, SCSS

Frontend Developer | YOONG Vietnam

Apr 2019 — Nov 2019

Built responsive user interfaces for corporate campaigns and talent platforms, including Mitsubishi Electric Vietnam and PG Works Vietnam.

- Interactive Campaign Showcases:**Developed pixel-perfect, responsive marketing portals and product catalogues for Mitsubishi Electric Vietnam using Vue.js, Nuxt, and modern SCSS.
- Talent Acquisition Dashboard:**Built applicant tracking and recruitment workflows for PG Works Vietnam using Element UI and Bootstrap, improving candidate form completion rates.
- Cross-Browser Performance & SEO:**Optimized front-end bundle sizes and implemented SEO best practices, achieving 95+ Google Lighthouse scores across desktop and mobile devices.

Technologies: Vue, Nuxt, SCSS, Bootstrap, Element UI, JavaScript

04 / EDUCATION & PROFESSIONAL QUALIFICATIONS

Information Technology — High Quality Program

2017 — 2019

International College Ho Chi Minh City — University of Science

Python Programming Course

Feb 2019 — May 2019

University of Science Ho Chi Minh City

CORE COMPETENCIES & LEADERSHIP FOCUS

Enterprise UI & Complex Workflows · Performance & Rendering · Cross-Functional Team Mentorship · Design Systems

Available for Senior / Lead Frontend & Full-Stack roles with modern Angular, React, and TypeScript stacks.
