7+

YEARS OF
EXPERIENCE

01 / PROFILE

Building useful products with clarity.

Senior Software Engineer with over seven years of experience building high-performance, enterprise-grade web applications. I connect robust technical architecture with thoughtful user experiences, with deep expertise in Angular, TypeScript, React, and Node.js ecosystems.

Beyond hands-on engineering and architecture, I actively drive project delivery strategies, streamline engineering workflows, and mentor engineers to build high-performing teams and scalable digital products.

02 / EXPERTISE

Core Capabilities

Frontend

Angular ReactJS TypeScript
RxJS Tailwind CSS SCSS
Kendo UI Ant Design Bootstrap
Element UI

Backend & Data

Node.js NestJS Microservices
Redis PostgreSQL REST APIs
GraphQL

Architecture

Microservices Architecture
Enterprise UI
Performance & Core Web Vitals
Design Systems
Engineering Process Optimization
Technical Mentorship

Design

Figma Adobe XD Photoshop
Illustrator Premiere Pro

03 / EXPERIENCE

Career Timeline

2019 — Today

May 2024 — Present SJ Group

Senior Software Engineer CURRENT

Architect enterprise Angular/Kendo UI portals and backend services for **Temasek Polytechnic** and **Changi Airport Group**, powering multi-tenant facility management, campus operations, fault dispatch, and procurement workflows.

- Core Operations & Microservices Delivery:** Decoupled mission-critical enterprise modules — Asset Management, Fault Reporting, Smart Facility Booking, Procurement, and Campus Inspection—into modular NestJS microservices; integrated FCM for auxiliary mobile push notifications and orchestrated 24+ zero-downtime releases via Bitbucket CI/CD.
- 230M+ Record Audit Pipeline & Export Engine:** Engineered a resilient data export pipeline for enterprise client auditing across 230M+ raw records (229M+ IoT telemetry, 787K+ bookings, 71K+ faults); overcame Excel's 1.04M row/sheet hard limit via streaming chunk partitioning, dynamic attachment metadata correlation, and portal-identical formatting with zero memory overflow.
- 70% Latency Reduction & Redis Caching Layer:** Implemented multi-tiered Redis caching (distributed locks for high-concurrency facility bookings, query cache, session store) and PostgreSQL query indexing, slashing database response latency by 70% under peak airport operational traffic.
- Design System & Enterprise UI Architecture:** Standardized reusable Angular and Kendo UI component libraries with strict TypeScript contracts, responsive state management, and unified UX patterns, elevating delivery velocity across a 7-engineer cross-functional squad.

Angular TypeScript NestJS Microservices Redis PostgreSQL FCM
Kendo UI Docker RxJS

Nov 2021 — Apr 2024 WATA Corp

Software Engineer

Engineered and scaled enterprise web & e-commerce platforms including **PoolZoom** and **The Mentor Method** for international enterprise clients.

- High-Converting E-Commerce Storefront (PoolZoom):** Engineered the storefront UI using Vue.js and Nuxt.js, implementing strict design system fidelity, Core Web Vitals optimization, and technical SEO for swimming pool equipment and parts.
- Cloudinary Image Pipeline & UX Optimization (PoolZoom):** Integrated Cloudinary for dynamic image transformations, responsive delivery, and format compression, drastically accelerating catalog browsing and optimizing overall user experience for 200,000+ customers.
- Mentorship & Training Architecture (The Mentor Method):** Architected modular curriculum frameworks, customizable roadmap templates, and skill-training libraries for mentors and mentees using Angular, Tailwind CSS, and GraphQL.
- Real-Time Session Transcription (The Mentor Method):** Integrated Google Speech-to-Text for live session transcription, automated notes generation, and comprehensive progress evaluation reports to enrich the mentorship experience.

04 / EDUCATION

Qualifications

2017 – 2019

Information Technology – High Quality Program

International College Ho Chi Minh City – University of Science

Feb 2019 – May 2019

Python Programming Course

University of Science Ho Chi Minh City

05 / LANGUAGES & COLLABORATION

Global Ready

English:

Professional Working Proficiency (Cross-border APAC, US & EU collaboration)

Vietnamese:

Native proficiency

Work Modes:

On-site, Hybrid, & Fully Remote

Career Timeline

2019 – 2021

Dec 2019 – Nov 2021 Gumi Vietnam Co., Ltd.

Software Engineer

Architected multi-tenant media CMS, health tech gamification, and corporate career platforms for major Japanese enterprises including **Nikkan Sports**, **AXA Direct Life**, **Gumi Career Support**, **Campus Career**, and Ajinomoto.

- Project Scaffolding & Multi-Tenant Media CMS (Nikkan Sports):** Initialized project architecture from scratch for a high-traffic Japanese sports news publishing system; engineered dynamic sub-domain rendering, dynamic form generators per sub-company, custom WYSIWYG article editors with drag-and-drop layouts, and granular RBAC workflows.
- Cognitive Brain-Training Gamification (AXA Direct Life & Active Brain CLUB):** Integrated interactive daily cognitive mini-games (Notore) into AXA's digital customer care ecosystem ("Emma by AXA"), targeting 6 core cognitive functions (memory, focus, speed, inhibition) for middle-aged and senior policyholders via Active Brain CLUB platform connectivity.
- Enterprise Career & Student Portals (Gumi Career Support & Campus Career):** Built career development and job-hunting portals for Tsukuba University students and Campus Career, featuring responsive interview preparation roadmaps, company matching algorithms, and streamlined recruiter-student communication channels.
- Internal Corporate Learning Management (Ajinomoto):** Developed internal employee training and onboarding workflows with progress tracking, interactive assessment modules, and offline capability powered by Angular PWA.

Apr 2019 – Nov 2019 YOONG Vietnam

Frontend Developer

Built responsive user interfaces for corporate campaigns and talent platforms, including **Mitsubishi Electric Vietnam** and **PG Works Vietnam**.

- Interactive Campaign Showcases:** Developed pixel-perfect, responsive marketing portals and product catalogues for Mitsubishi Electric Vietnam using Vue.js, Nuxt, and modern SCSS.
- Talent Acquisition Dashboard:** Built applicant tracking and recruitment workflows for PG Works Vietnam using Element UI and Bootstrap, improving candidate form completion rates.
- Cross-Browser Performance & SEO:** Optimized front-end bundle sizes and implemented SEO best practices, achieving 95+ Google Lighthouse scores across desktop and mobile devices.

07 / CORE STRENGTHS

What I bring to teams

Enterprise UI & Architecture

Designing scalable Angular & React design systems, high-performance data grids, and accessible workflows.

Engineering Leadership & Velocity

24+ production releases, code review rigor, mentoring engineers, and fast cross-functional delivery.

Performance & Optimization

70% latency reductions, route splitting, virtual scrolling, and sub-second enterprise response times.

International Collaboration

Seamless communication with global stakeholders across Singapore, Japan, the US, and Europe.
